

Documento da Explicação das Variáveis (Gestão Empresa)		
	NOME	Explicando as Variáveis
Classe	Fornecedor	
Variável	nome	holds the info of the supplier's name
Variável	telefone	holds the info of the supplier's phone
Variável	celular	holds the info of the supplier's cellphone
Variável	listaProduto	maintains a list of supplier's products
Variável	endereço	holds the info of the supplier's address
Classe	FornecedorFisico	
Variável	cpf	holds the info of the physical supplier's cpf
Variável	rg	holds the info of the physical supplier's rg
Variável	FornecedorJuridico	
Variável	razaoSocial	holds the info of the legal supplier's corporate name
Variável	cnpj	holds the info of the legal supplier's cnpj
Classe	ControleFornecedor	
Variável	listaFornecedor	maintains a list of objects of type Fornecedor
Variável	f	Object from the Fornecedor Class that receives supplier's info and updates the list
Variável	nome	receives the info of name of the Fornecedor class's object
Variável	pesquisa	receives the boolean info of search
Variável	volta	receives an object from the Fornecedor class if the name is equal to received name and the research equals true
Variável	voltaExata	receives a Object from the Fornecedor Class if the name is equal to received name
Classe	TelaDadosContatos	
Variável	umControleCliente	Object from the ControleCliente Class that is instantiated to maintenance of the customer
Variável	umControleFornecedor	Object from the ControleFornecedor Class that is instantiated to maintenance of the supplier
Variável	umControleFuncionario	Object from the ControleFuncionario Class that is instantiated to maintenance of the employee
Variável	principal	Object from the GestãoEmpresa Class that instantiates the main view
Variável	umClienteFisico	Object from the ClienteFisico Class that is instantiated to receives the information of the customer
Variável	umClienteJuridico	Object from the ClienteJuridico Class that is instantiated to receives the information of the customer
Variável	umFornecedorFisico	Object from the FornecedorFisico Class that is instantiated to receives the information of the supplier
Variável	umFornecedorJuridico	Object from the FornecedorJuridico Class that is instantiated to receives the information of the supplier
Variável	umFuncionario	Object from the Funcionario Class that is instantiated to receives the information of the employee
Variável	editClienteFisico	Object from the ClienteFisico Class that is instantiated to receive and update the information of the customer
Variável	editClienteJuridico	Object from the ClienteJuridico Class that is instantiated to receive and update the information of the customer
Variável	editFornecedorFisico	Object from the FornecedorFisico Class that is instantiated to receive and update the information of the supplier
Variável	editFornecedorJuridico	Object from the FornecedorJuridico Class that is instantiated to receive and update the information of the supplier
Variável	editFuncionario	Object from the Funcionario Class that is instantiated to receive and update the information of the employee
Variável	nome	receives the name info of the view's text field
Variável	telefone	receives the phone info of the view's text field
Variável	celular	receives the cell phone info of the view's text field
Variável	cpfcnpj	receives the cpf or cnpj info of the view's text field
Variável	rgrazaoSocial	receives the rg or corporate name info of the view's text field
Variável	lougrado	receives the rg or corporate name info of the view's text field
Variável	numero	receives the number info of the view's text field
Variável	cidade	receives the city info of the view's text field
Variável	estado	receives the state info of the view's text field
Variável	pais	receives the country info of the view's text field
Variável	complemento	receives the complement info of the view's text field
Variável	cargo	receives the post info of the view's text field
Variável	salario	receives the salary info of the view's text field
Variável	umEndereco	Object from the Endereco Class that is instantiated to receives the information of the address
Classe	TelaEstoque	
variável	principal	Object from the GestãoEmpresa Class that instantiates the main view
variável	novoProduto	receives the boolean info
variável	codigoTabela	receives an info of the view's table
variável	descricaoTabela	receives an info of the view's table
variável	returnProduto	receives the boolean info
variável	listaProdutos	receives a list of products from the class ControleEstoque
